

### REMARKS/ Arguments

In response to the Office Action mailed October 22, 2003, Applicant respectfully requests that the Examiner reconsider his rejection of the claims.

Claims 6-13 remain.

Claims 1-5 are being cancelled.

Claims 6, 7, 12, and 13 are being amended.

Claims 1 - 7, 12 and 13 stand rejected under 35 U.S.C. § 101 because the claimed invention is directed to non-statutory subject matter. Claims 1 – 5 have been cancelled and Claims 6 – 7 and 12 – 13 have been amended into statutorily permissible method claims.

Claims 6 –13 stand rejected under 35 U.S.C. § 103(a) as being unpatentable over *Lyons, et al.* (U.S. Patent 6,075,798) (hereinafter "the *Lyons* reference").

Applicant respectfully traverses these rejections.

The *Lyons* reference does not disclose or suggest providing extension bits within a packet header which indicate whether the fields within that header have been modified. Instead, the *Lyons* reference only discloses a system in which extension bits to the header are used to indicate changes *external* to the header. Specifically, the disclosed extended header only indicates that the transmission bit rate of the following data packets has changed (the *Lyons* reference, Col. 9, Lines 36 – 41). The *Lyons* reference does not suggest that the described header extensions could be used to indicate changes within the header itself.

No new matter has been added, but the claims merely amended to more particularly point out and distinctly claim the subject matter Applicants believe is inventive.
